Shine a light on Lymphoedema

It is not known how many Australians have lymphoedema

Lymphoedema is often misdiagnosed, undetected & the statistics are not adequately collected.

Mary's Story:

"I was diagnosed with lymphoedema in my right leg 45 years ago when I was a flight attendant. I've had to teach my doctor all about my condition."

What is lymphoedema?

Lymphoedema is swelling due to malfunction of the lymphatic system. It can occur after cancer treatment or even from birth. It adversely impacts on the physical, emotional, social and financial wellbeing of people living with the condition.

Please support lymphoedema week 2-8 March 2026
